2

What This Volume Is About

Volume 2 helps parents transform random actions, body movements and early signals into purposeful communication. It teaches the child that reaching, giving, pointing, gesturing, looking and vocalising can change what happens around them.

The volume also strengthens imitation, play, early cause-effect thinking and object understanding. These skills create the bridge from passive responding to intentional participation - the stage at which the child begins to discover, "My voice matters."

Every volume includes the same orientation tools, so parents can understand the full sequence and begin at the level that matches the child today - not the level they hope to reach later.

VOLUME 2

Who Should Read This Volume?

- Your child is regulated enough to engage but does not yet communicate intentionally.
- Pointing, showing and joint-attention initiation are absent or inconsistent.
- There are no words, or only a few words used without clear purpose.
- Communication happens mainly through pulling, leading, crying or meltdowns.
- Echolalia or AAC is present, but not yet used consistently to communicate a goal.
- Your child needs help learning imitation, cause-effect and early symbolic readiness.

4 What Problem This Volume Solves

- Converts unclear pre-intentional behaviour into understandable communication signals.
- Builds purposeful gestures before demanding spoken language.
- Reduces dependence on pulling adults or escalating behaviour to get needs met.
- Creates the cognitive and social readiness needed for meaningful first words.

VOLUME 2

What You Learn From This Volume

- Recognise and respond to pre-intentional signals.
- Build conventional and creative object use.
- Teach intentional reaching, giving and showing.
- Develop functional play and non-speech vocal imitation.
- Develop pointing to request and share interest.
- Encourage sound and early word approximations.
- Expand the child's functional gesture repertoire.
- Build cause-effect, means-end and object-permanence skills.
- Use anticipation and social rituals to build participation.
- Introduce early categorisation, matching and recall.
- Teach gross, fine and object-based motor imitation.

Designed for practice inside ordinary family routines - not only at a therapy table.
